MISSION

In its agenda, EducationIRAN has listed many responsibilities. Our main aim is to develop an effective system which monitors and governs a great portion of Iran’s higher education system in terms of its involvement as an educational destination for international students.

From another viewpoint, EducationIRAN will provide domestic higher education institutions with opportunities to have a constant presence in the international higher education community and maintain productive interactions with other educational entities around the world. In order to achieve our purposes, it is of the utmost importance to present a unified system of higher education to the world. It is imperative to work closely with all our member organizations to recognize and realize common goals.

Putting Iran on the map in the global higher education landscape is a vital necessity; a necessity which EducationIRAN has promised to fulfill.

VISION

Envisioning Iran as one of the major hubs of higher education in the future, EducationIRAN will strive to lower the drawbridge between Iran’s higher education and the world which awaits outside.

We recognize our country’s great potential in contributing to the global higher education community, and, more than ever before, we are willing to work toward realizing this potential.

EducationIRAN aims to act as the main gateway in introducing Iran’s higher education to the world.
Iran is currently one of the world’s leading countries regarding its higher education system’s rate of growth. As a country with a young population and plentiful resources, and the fact that it houses a number of Asia’s leading universities and research centers, Iran is already becoming a favorite higher education destination in its surrounding region and Asia.

To be a candidate for EducationIRAN membership, all institutions need to meet our membership standards which reflect the foundational requirements. The members will receive considerable benefits tailored to their needs.
